EVALUATORS' CITATION

Mr Hu has been a strong influence in the development of Shanghai city. He established a greening legal requirement in Shanghai and inaugurated a new era of green development, raising the standards of a green coverage ratio to unprecedented levels, leading Shanghai to be ranked top amongst the National garden cities. His published work "Ecological Landscape Theories and Practice" drove and positively impacted the ecological restoration and rebuilding of New Jiangwan Town, increasing the land value tremendously. Mr Hu has been instrumental in redefining Shanghai greenery construction and has led reviews and revision of standards, codes and legal documents to improve the regulations governing urban landscape construction and management.

Mr Hu is deserving of this Luminary Award because of his leadership and work behind the scenes, constructing standards and codes that are fundamental to advances in greening governance.
